

How to create a shortcut for a web page

First, go to the web site. **For example** I will show you how to make a shortcut for the Pampa ISD site.

Click on this link to take you to our site.

<http://www.pampaisd.net/>

For IE, Chrome and Fire Fox you can simply click and drag the icon that is at the beginning of the URL (see the yellow arrow) to your desktop. You will need to have the window minimized to have room to drag to your desktop.
